# Kharif sowing picks up with rains

SANDIP DAS  
New Delhi, July 8

WITH THE MONSOON being active over southern, central and western regions over the last one week, sowing of Kharif crops such as paddy, pulses, oilseeds, coarse cereals and cotton has picked up pace.

According to agriculture ministry data released on Friday, Kharif crops have been sown in 40.66 million hectare (MH) which is about 9% less than corresponding period last year. The shortfall in area covered under Kharif crops in relation to 2021 on June 24 was 24%. Among major Kharif crops, acreage of pulses is marginally higher than last year. Cotton sowing has been close to the same period last year and coarse cereals marginally higher. Sugarcane sowing is reported at 5.3 MH which is on par with the previous year.

Sowing of oilseeds including soybean and groundnut has been lagging behind by 19% at 7.7 MH compared to the same period last year. However according to official data, soy-

bean has been sown in 5.4 MH so far while Soybean Processor Association of India says variety of oilseed has been sown in 7 MH. Rice sowing progress has been lagging behind by more than 22% compared to last year. An agriculture ministry official said the window for sowing of Kharif crops is till the end of July and pace of sowing will pick up pace further in coming weeks. Kharif crops are sown around 106 MH.

The adequate and well distributed rainfall during monsoon months (June-September) helps in boosting kharif crop production besides ensuring sufficient moisture for the rabi crops. In April 2022, the government had set a record foodgrain

production target of 328 million tonne (MT) in the 2022-23 crop year (July-June) against 314 MT of production in 2021-22, as per the third advance estimate of foodgrain output.

India Meteorological Department in its forecast on Friday said "active monsoon conditions over central India and along west coast are likely to continue during next five days and increase of rainfall over Northwest India during next three days."

The monsoon has picked up pace since June 16 when deficiency in monsoon rains was 25%. A Met department official said that the monsoon has been active over the central, west and southern region in the last one week. During June 1-7, the cumulative average monsoon rainfall was 234.5 mm.
